A crisis is a time of intense difficulty. Describe ways people recover from a personal crisis (such as losing a job or getting injured).

Your response

Words:0

Re-practice Submit

Answer

Nowadays, there can be crises when people have intense difficulty, such as losing a job. The causes of this are various, and several measures need to be taken to change this phenomenon. It is an indisputable fact that people need to recover from this kind of personal crisis as soon as possible. Firstly, people can start by writing their resumes, and followed by that, start looking for jobs on the internet that are suitable for them. Last but not least, people can call the companies directly to ask if they are still hiring. To put it in a nutshell, individuals must work hard to combat these problems.

The internet allows us to share information quickly and easily, but this constant flow of information may cause personal and social problems. Describe some of the negative consequences of this flood of information.

Your response

Words:0

Re-practice Submit

Answer

Nowadays, people can share information quickly and easily when they are communicating on their computers thanks to the invention of the internet. But this constant flow of information may lead to negative consequences that have impacts on people's personal and social life. To start with, as the information is shared quickly and easily, people's personal information may not be protected, which may be illegally used by third parties. The constantly shared information on the internet can also lead to internet fraud, which harms the society. In conclusion, the constantly shared information on the internet can have negative impacts on both personal life and society.

Society has changed a lot over the last ten years. Describe one of these changes and why it has taken place. Include specific reasons.

Your response

Words:0

Re-practice Submit

Answer

The last decade has seen significant shifts in the sources of fuel used to provide energy away from sources seen as dirtier for the environment and contributing to climate change like coal. The use of coal in China has declined since 2010 as natural and renewable energy become cheaper. According to a report released by the government, between 2010 and the first part of 2019, 546 coal-fired power plants had shut down. The reason for such a situation lies in people's awareness of environmental protection. People now tend to pay much more attention to the emission of gas and are committed to protecting the earth from the greenhouse effect.

The expression never give up means to keep trying and never stop working toward your goals. Do you agree or disagree with this philosophy? Why? Give specific reasons for your answer.

Your response

Words:0

Re-practice Submit

Answer

Although some people believe that never giving up is the fundamental philosophy when aiming at success, I am more inclined to the belief that evaluating the possibility of achieving goals and managing time accordingly is a more efficient way to avoid any work that is in vain. If people keep trying and never stop working towards an almost impossible goal, then they will have wasted time and resources, which could have been utilized somewhere else. Therefore, the philosophy of never giving up is not necessarily applicable to everyone in our society, especially when someone cannot set a reachable goal.

Why is music so important to so many different people? Give specific reasons for your answer.

Your response

Words:0

Re-practice Submit

Answer

When it comes to the importance of music in our society, I suppose everyone has his or her own type of music. For centuries, music has been playing a significant role in everyone's life, regardless of their social status, educational background, or personalities. This is not only because music is a typical form of art, but also because it can help people do many things. For instance, many students would like to listen to music when they are studying to help them calm and think. Music is also an excellent vehicle by which history is uniquely presented to its audience. Musicians express their feelings and understandings of the world around them in masterpieces, and other people of their age, as well as later generations, can share the same

Some people prefer to plan all their vacation activities. Others prefer to be spontaneous (decide what to do at the last minute). Which do you prefer? Why? Give specific reasons for your answer.

Your response

Words:0

Re-practice Submit

Answer

There is an ongoing debate about whether to plan all our vacation activities or decide what to do at the last minute. While it is possible to claim that being spontaneous gives you a sense of freedom, my view is that we should make plans in advance. There are several solid reasons why planning in advance is considered to be advantageous. Firstly, by doing some preparation, people already have the plan for the day on what to do, what to see, and how they will travel to those places; therefore, they could visit more attractive and unique places during their holiday time. Secondly, a planned holiday would definitely save more budgets. People

Describe a time when someone was treated unfairly. What happened? Include specific details in your answer.

Your response

Words:0

Re-practice Submit

Answer

Speaking of a time when someone was treated unfairly, the first thing that jumps to my mind is the small incident that happened to my friend a few days ago. My friend Amy was waiting in line, suddenly the lady who stood in front of her turned around and asked her to go back to her own country. My friend was astonished by her words and felt sad about herself. Discrimination always happens when you are alone in a foreign country. In my opinion, people are treated unfairly for various reasons: age, gender, the way a person is dressed, and religious beliefs. However, everyone deserved to be respected despite his or her appearance and financial status.

Some people are content with what they have, while others are never satisfied. Describe the advantages and disadvantages of these two attitudes.

Your response

Words:0

Re-practice Submit

Answer

At some point or another, we all get caught in the future trap. If I could just earn X, or achieve Y, I'll be happy. We all know that superficial things such as money, status, power give fleeting, temporary happiness. Yet, some people never get satisfied. There are advantages and disadvantages of people who content with what they have and those who never satisfied. To start with, people who never satisfied will try to pursue more, and they never give up. However, they can become greedy and do whatever they can to get everything they want. For the other kind of people, they always cherish what they have. However, they may turn out to be lazy and do not want to fight for anything they want.

A diverse workplace includes employees with many different backgrounds (ethnic, cultural, religious, etc.). Describe some of the benefits of diversity in the workplace.

Your response

Words:0

Re-practice Submit

Answer

Diversity in the workplace has launched a heated debate in today's society. It is an indisputable fact that diversity can bring a number of benefits to the workplace. First of all, such diversity can potentially ameliorate the overall performance of the company. That is to say, when employees are coming from different backgrounds working in collaboration, the likelihood of coming up with more creative ideas, and hence achieving better outcomes will be significantly increased. Besides that, workplace diversity can eliminate discrimination against others, such as people with dark skin. To sum up, it would be great to have workers from various backgrounds in the workplace.

Describe ways in which individuals can help end prejudice and discrimination in their social circles.

Your response

Words:0

Re-practice Submit

Answer

The first and most crucial way in the fight against prejudice and discrimination is recognizing them and acknowledging that we are all affected by them. Everyone has definite ideas about certain groups of people that never apply to all members of that group. If you are and remain aware of this fact, you have already taken the most significant step. We should also make sure that our own prejudices do not determine our behavior. Prejudice should never lead to exclusion or discrimination against others. Also, make sure that you do not spread your own prejudices. We also need to react! If someone around you hurts other people, insults entire groups, or uses prejudice to define them, react. Oppose them! React in your own circle of friends and acquaintances, respond on social media. You can ask people to tone it down. You can discuss the issue or make yourself heard in another way. You can let people know that you are not okay with offensive or insulting prejudices - whether they affect others or yourself.

It is easier to prepare food today compared to 100 years ago. Has this change improved our lives? Why or why not? Give specific reasons for your answer.

Your response

Words:0

Re-practice Submit

Answer

Some people hold the view that our lives are improved because of easier food preparation today than 100 years ago, while I am more inclined to believe that life quality is not necessarily better with the level of difficulty of preparing food. If people do not focus on the balance of their diet, then fast food such as burgers and fried chicken will swamp our daily eating and rather negatively affect our health. For instance, a research published recently by World Health Organization states that more than 34% world population has health issues related to fast food eating habit. Thus, there is no causal link between easier preparation of food and the improvement of life quality.

Habitat loss - due to destruction, fragmentation, or degradation of habitat - is the primary threat to the survival of wildlife in most countries around the world. When an ecosystem has been dramatically changed by human activities - such as agriculture, oil and gas exploration, commercial development, or water diversion - it may no longer be able to provide the food, water, cover, and places that wildlife need to survive. Every day there are fewer places left that wildlife can call home. A bulldozer pushing down trees is the iconic image of habitat destruction. Other ways people directly destroy habitat include filling in wetlands, dredging rivers, mowing fields, and cutting down trees. Much of the remaining terrestrial wildlife habitat has been cut up into fragments by roads and development. Aquatic species' habitats have been fragmented by dams and water diversions. These fragments of habitat may not be large or connected enough to support species that need a large territory where they can find mates and food. The loss and fragmentation of habitats make it difficult for migratory species to find places to rest and feed along their migration routes. Pollution, invasive species, and disruption of ecosystem processes (such as changing the intensity of fires in an ecosystem) are some of the ways habitats can become so degraded that they no longer support native wildlife.

Some people believe that success comes primarily from taking risks. Others believe that success is the result of careful planning. What do you believe? Why? Give specific reasons for your answer.

Your response

Words:0

Re-practice Submit

Answer

The controversial issue with respect to the key to success has attracted large public attention and sparked a heated debate. Personally, I believe that success is the result of careful planning. The first and foremost reason why I hold this position is that without thoughtful planning prior to the commencement, a project is highly likely to end up in a mess due to uncertainty. This being said, a comprehensive plan can effectively increase the likelihood of success.

Some people trust their first impressions of other people, while others try not to judge too quickly. Which attitude do you agree with most? Why? Give specific reasons for your answer.

Your response

Words:0

Re-practice Submit

Answer

The debate over first impressions has always intrigued people. Personally, I believe in first impressions. When we meet someone for the first time, we make judgments about their trustworthiness and competence in a fraction of a second. We do this based on a variety of clues, including physical appearance, facial characteristics, posture, gestures, attire and so on. This makes sense from an evolutionary perspective. We are visual creatures. When we meet a stranger, we tend to assess them by their overall look, including their physical appearance and attire. One's physical appearance somewhat indicates his or her personality, while one's attire tells us his or her taste and social-economic class, which in turn implies his or her competence.

Technology has made the world a better place. Do you agree or disagree? Why? Give specific reasons for your answer.

Your response

Words:0

Re-practice Submit

Answer

When it comes to whether technology has made the world a better place, I would strongly agree with it. First of all, technology underlies almost every aspect of today's human society. That is to say, human being's activities are heavily dependent on technology. For instance, without the invention of the plane, people wouldn't be able to travel the world either for fun or for business in a remarkably short period; what's more, without the invention of the internet, people wouldn't be able to learn the news and communicate so quickly

How do you think your generation is different from your parent's generation? Give specific reasons for your answer.

Your response

Words:0

Re-practice Submit

Answer

The principal differences between my generation and my parents' generation are in how they relate to others. My generation is more tolerant of other people's choices, less concerned about what others think, and more self-centered. My parents' generation has stricter standards about what kinds of behavior are acceptable. They sometimes have a hard time accepting the fact that other people may have different ideas about what's right and what's wrong. My generation thinks people should have many choices. For example, they choose whom they want to live with, whether or not to have children, whether or not to practice a particular religion, and what to do for a living. My parents' generation is much more concerned about what

Answer

The principal differences between my generation and my parents' generation are in how they relate to others. My generation is more tolerant of other people's choices, less concerned about what others think, and more self-centered. My parents' generation has stricter standards about what kinds of behavior are acceptable. They sometimes have a hard time accepting the fact that other people may have different ideas about what's right and what's wrong. My generation thinks people should have many choices. For example, they choose whom they want to live with, whether or not to have children, whether or not to practice a particular religion, and what to do for a living. My parents' generation is much more concerned about what other people think of them. Many grew up in tightly knit communities where people knew each other's families. Filling in meant that you had to act a certain way. Many of my generations grew up in loosely knit communities, where we only knew about our closest neighbors. We didn't care what the rest of the community thought of us. Also, we were a very rebellious generation and often did things just to shock people. Wherever we grew up, most of my generation didn't have to worry about having enough to eat or a roof over our heads. My parents' generation did. They grew up during the Great Depression when many people were poor. For this reason, my parents didn't have time to analyze their feelings or think about their inner selves. They were too busy trying to get by. Children of my generation were well taken care of by their parents. Because of that, we had time to think about ourselves and our place in the universe. As adults, many of us have continued to be self-absorbed. We join health clubs to be perfect in the body and go into therapy to be perfect in mind.

Your school has enough money to either build a computer lab or a library full of books. What do you recommend? Give specific reasons for your recommendation.

Your response

Words:0

Re-practice Submit

Answer

I believe schools should build a school library full of books. The school library is a central hub supporting every students and staff members, as well as parents. The library combines several elements – library staff, resources, and spaces. Each of these plays an essential role in supporting teaching and learning. Libraries provide another space for students to learn. They can help students navigate the internet, offer a quiet area for students to study, and encourage students to read. The staff, knowing what books a student enjoys, can help them choose books that are similar to their interests. Sometimes they are not even books the student knew they would like. Providing students with books that interest them is another way to encourage

The library combines several elements – library staff, resources, and spaces. Each of these plays an essential role in supporting teaching and learning. Libraries provide another space for students to learn. They can help students navigate the internet, offer a quiet area for students to study, and encourage students to read. The staff, knowing what books a student enjoys, can help them choose books that are similar to their interests. Sometimes they are not even books the student knew they would like. Providing students with books that interest them is another way to encourage students to read more. They dig into a new book they started to read in the library and end up not putting it down until they must. A library is an important source of knowledge to young minds in schools. It develops the important habit of reading among the students. Every school should have a library. The school library plays a great role in the life of students by serving as the storehouse of knowledge.

Answer

If I were asked about a major decision that I have made recently, I would tell you the following story. It was last year's winter, when one of my best friends, William, asked me if I would like to go skiing with him and a group of his friends, I didn't give him my answer straight away. Instead, I had a thorough thought over that plan for a couple of days because I had never been skiing before, and I hardly knew any of the other people in the group. Finally, I made my mind – I decided to join them and leave all the concerns behind. I suppose the most significant driver was the will to try playing extreme sports. The trip actually went smoothly, and I made many new friends along the way. If, for any reason, I had chosen otherwise, I suppose that I would

Food often brings people together. Describe ways that people connect with each other by eating together.

Your response

Words:0

Re-practice Submit

Answer

Food has been the central part of human culture for centuries. Although taste varies from people to people, people tend to gather together for eating. In my culture, business people tend to discuss business issues over a decent meal. Apparently, the likelihood of getting an agreement settled during dinner time is comparatively higher. The reason may be that when eating, people are more likely to be amused and get a sense of satisfaction, so all the parties can finally arrive at an agreement. Apart from that, when friends are to hang out together, a highly rated restaurant often comes as the top choice. People will have a good gossip while eating, and probably have a drink or two, then the conversation will go on for a fair while.

Describe something you wear every day because it is special to you (for example, a ring or a watch). What does it look like? Why is it special? Give a few reasons.

Your response

Words:0

Re-practice Submit

Answer

There is a ring I would wear every day, which is my wedding ring. The ring itself is in the color of yellow, which is made of pure gold. The shape of the ring is like the math symbol infinity that represents our love and marriage will last forever. What's more, it also has a lot of diamonds around it that makes it very shiny. It is very special to me not only because of its shape and meanings, but also because the initials of my husband and me are crafted on the back of the ring, as well as the date of our marriage which is the ninth of September. In Chinese, it also has the meaning of a long-lasting relationship. It is this special wedding ring that I cherish very much.

Answer

All of the habits that we have right now – good or bad – are in our life for a reason. In some way, these behaviors provide a benefit to you, even if they are bad for you in other ways. Sometimes the benefit is biological like it is with smoking or drugs. Sometimes it's emotional like it is when you stay in a relationship that is bad for you. And in many cases, your bad habit is a simple way to cope with stress, for example, biting your nails, pulling your hair, or tapping your foot. There are a few steps that you can do to break a bad habit. Firstly, choose a substitute for your bad habit. You need to have a plan ahead of time for how you will respond when you face the stress or boredom that prompts your bad habit. For example, what are you going to do when you get the urge to smoke? Maybe you can choose breathing exercises instead. Whatever it is and whatever you're dealing with, you need to have a plan for what you will do instead of your bad habit. Secondly, cut out as many triggers as possible. If you smoke when you drink, then don't go to the bar. If you eat cookies when they are in the house, then throw them all away. If the first thing you do when you sit on the couch is pick up the TV remote, then hide the remote in a closet in a different room. Make it easier for yourself to break bad habits by avoiding the things that cause them. Last but not least, surround yourself with people who live the way you want to live. You don't need to ditch your old friends, but don't underestimate the power of finding some new ones.

When people succeed, it is because of hard work; luck has nothing to do with success. Do you agree or disagree? Why? Give specific reasons for your answer.

Your response

Words:0

Re-practice Submit

Answer

Some people hold the view that success is achieved via hard work only. While there are certainly valid viewpoints, on the contrary, I personally believe that sometimes luck can lead to success as well. This is because luck is often associated with opportunity, and in order to succeed, one needs the right timing and opportunity. If a person has put all his effort into getting prepared for something, but unfortunately missed the only chance to get the final step done, then everything is meaningless. To sum up, considering all the factors mentioned above, luck is an essential part of success

Is it better to be idealistic (aiming for perfection) or realistic (setting goals you know you can achieve)? Why? Give specific reasons for your answer.

Your response

Words:0

Re-practice Submit

Answer

Although some people believe that being realistic is better than idealistic, I am more inclined to the belief that idealistic people are more likely to have a successful life and gain happiness. That is to say, idealists can imagine solutions that are often unique and unusual. Idealists always see the good in everyone. They like people and are able to love unconditionally. For example, a study from Harvard University states that 70% of its graduates who agree with idealistic is better, have expressed that they have better performance at work. In conclusion, considering all the factors above, we may safely draw the conclusion that being realistic means more chance to live successfully.

Some children spend a lot of time in classes and planned activities. Why is it important for children to have free time? Give specific reasons for your answer.

Your response

Words:0

Re-practice Submit

Answer

Free-time is a good thing. Parents spend a lot of time encouraging their children to participate in recreational activities during the school year. There is nothing wrong with having children participate in different activities as it helps them figure out what they are passionate about; however, over-scheduling children with too many activities can often lead to increased stress in children and the parents themselves. It is important for parents to be cautious about how much they should schedule their children and how much free time is left to their children. For young children, having free-time is an opportunity to learn self-sufficiency and self-regulation. While they may prefer to be entertained, unstructured free time for children gives them a chance to work through the refusal of instant gratification, find a different activity, and learn how to handle their emotions appropriately.

Think about a time when you stopped to look at something beautiful (like a sunset or a flower). Describe the experience. Include specific details.

Your response

Words:0

Re-practice Submit

Answer

Last year, me and my friend took a trip to New Zealand. At the famous Piha Beach, we experienced the most beautiful sunset ever. The Piha Beach is famous not only as a surfing paradise, but also for its beautiful sea view trail, with virgin forest on one side and coastline on the other. We were lying on the beach and I closed my eyes to experience it with my soul and not just my eyes. I could hear the waves hitting the shore, trees speaking to each other, sea birds cooling for food. The moisture and warmth in the air gave me chills. The sand beneath my feet flowed away slowly. As the waves hit my feet, I opened my eyes to witness the magnificent sunset happening right in front of me. The big orange ball slowly went down and down and it set into the horizon, making the sky absolutely stunning and leaving behind so many colours. The red sky became sailors' delight. The seagulls flew before the sunset bidding the sun a goodbye. As the white ball rose, the tides became higher. The bright orange sky turned into pitch black in an hour.

In any relationship, the most important thing is to always tell the truth. Do you agree or disagree? Give specific reasons for your answer.

Your response

Words:0

Re-practice Submit

Answer

The controversial issue in respect of telling the truth, in today's society, has drawn huge public attention and sparked great controversies. In my opinion, people are not supposed to always tell the truth regardless of the circumstances. This is because despite the fact that truth is deemed to be what people are constantly seeking, it may sometimes hurt people, especially when the truth goes counter to what a person is expecting. For instance, you have never cooked before, but would like to cook for your mother on her birthday, so you put all your effort into making that meal. At the end of the day, your mother is going to tell you that the meal is amazing no matter how bad it actually tastes. Although it is a lie, both of you would be happy.

hedwigedu.com/practice/WritingRead/?num=48

Playing a game is fun only if you win. Do you agree or disagree? Give specific reasons for your answer.

Your response

Words:0

Re-practice Submit

Answer

Playing a game itself is fun whether people win or lose. At the end of a game, there is always one winner, but that does not mean that other players have not enjoyed the game. First of all, I believe that games must be played for an enjoyment purpose. If people all play games for the sake of winning it, then their focus will be on the target, which is good. But on the other hand, players should not be involved deeply in a game if they lost it. Secondly, I am convinced that participation in a game is of greater value than winning it. It is not always important to win the game. Participants can learn lots of things during the course. Playing games is supposed to be a great way to find out more about each other, to communicate and learn new things.

Sometimes it is difficult to find a job. If you cannot find a job, what should you do? Give a few examples.

Your response

Words:0

Re-practice Submit

Answer

Employers won't hire someone who doesn't have the majority of the skills, education, or job experience necessary for the position. So, if you can't find a job because you need to boost your skillset, consider going back to school or finding online resources to gain the skills you need. Do a bit of research on which industries and type of jobs are hiring for remote workers to help speed along with your search. Some people will move to a different city, state, or country in order to find a job in their field. However, it's ok to take some time off from your job search once in a while. Allow yourself a day or a few days off and spend that time doing something that energizes you and makes you happy, and reflect on what's going well in your search. Afterwards, you'll be able to get back to your job search with a renewed sense of energy and purpose.

What are the benefits of exercise? Include specific examples in your answer.

Your response

Words:0

Re-practice Submit

Answer

The first and most important reason for doing exercise is to help control weight and prevent obesity. Especially in hustle and bustle, junk food has become our main choice, which causes more calories than what our body can burn. Moreover, appropriate exercise will significantly reduce the opportunity and risk of diseases. For instance, my father has been running marathons for five years, and he has not been diagnosed with any serious diseases compared to his peers. Regular exercise also benefits mental health and mood in the long run, which enables us to get rid of the stress and depression accumulated in daily study and work.

What are the disadvantages of being famous?

Your response

Words:0

Re-practice Submit

Answer

The most significant disadvantage of being famous is that celebrities often lack privacy. Wherever they go, they will become the focus of the crowds, which will cause troubles not only for themselves but also for their families. The other disadvantage is that they need to pay more attention to their behaviors all the time to build up a good image for the public. If there are some scandals around them, their reputation will be destroyed significantly, and they may lose the opportunities for advertisements or movies. In conclusion, when celebrities are enjoying the public's applause, they also shoulder the burden of massive focus.

Some research suggests that watching television influences children's behavior. Specifically, watching television may increase violent or aggressive behavior. What recommendations would you make to parents based on this evidence? Give specific reasons for your recommendations.

Your response

Words:0

Re-practice Submit

Answer

The controversial issue in respect of children's TV watching has attracted the public's attention and sparked a heated debated in recent years. As far as I am concerned, exposure to violent content does not necessarily cause violent or aggressive behaviour. As for children, if parents are going to show them violent media, tell kids that media is only meant to be entertaining, and that in real life, violence is not okay, and make sure they understand the consequences of real-world violence. By doing so, when children play and watch violent media, they will know that it is only entertaining, not something meant to be copied. They can consume such media, and still be a good person. Besides, parents can set limits on how much television their children are allowed to watch on a daily or weekly basis in order to minimise the effect of the TV content that can potentially have on children.

Describe one widespread but preventable health problem in your country and discuss some of the ways it can be prevented.

Your response

Words:0

Re-practice Submit

Answer

When it comes to one widespread but preventable health problem in my country, the first thing that jumps into my mind is obesity. Obesity is a disease that people develop when they become considerably overweight. And it can further lead to a series of serious consequences, such as the loss of mobility and a broad range of complications among which some can even kill the patients. Therefore, it is of great importance to warn people of the danger of obesity and inform them of ways to prevent it. Firstly, people should consume less unhealthy food, such as those high in sugar or fat. Secondly, it should be encouraged that people eat slowly and only when hungry as overeating is the major cause of obesity. Thirdly, people should incorporate fun and exciting physical activities and try to keep exercising on a regular basis.

Answer

I would definitely recommend the company to contribute funds to an organization that promotes environmental protection. First of all, sustainability has been a historically persistent topic, and everyone on the planet should assume the responsibility of protecting the environment in which we live. This investment may not necessarily be profitable any time soon, but it will surely be beneficial, both to the company and the earth, in the long run. Secondly, this investment is for the sake of future generations. Without an enjoyable environment to live in, no arts will be appreciated. In this sense, investment in environmental protection is of greater value than that on arts.
