Is literacy (the ability to read and write) more important today than it was in the past? Why or why not? Give specific reasons for your answer.

Sample answer (I got this question at my real test): Many believe that literacy is more important in present days, while others think that literacy is only essential in the past. I agree with the former. First and Foremost, the ability to read and write is important because it will help students enhance critical thinking. Some might argue that literacy is not essential anymore since technology will replace the necessity of reading and writing. Moreover, the ability to read and write is beneficial to our future job. For example, you need to learn how to read and write so you can get into a well-known university or college and get a good job in the future. To put it in a nutshell, The ability to read and write has grown more significantly in the recent decade. (125 words)

3. Speaking: describe an image (90 seconds) ~70 seconds

Tips: Firstly, describe the main character in that picture (It might be an animal or a person) Next, you should describe his or her clothings (using vocabulary listed above) Last but not least, you have to describe what's at the background of the picture and put some of your prediction at the last sentence. (For example, I guess this picture.....)
